PROFESSIONAL SUMMARY

Looking forward to work in a challenging and healthy organizational environment where I can achieve self-development through succeeding in fulfillment of the organizational goals. To assist my skills and knowledge in every way possible as per the organization requirements. To thrive in an environment of growth and excellence and earn a job satisfaction and help me achieve personal as well as organizational goals.

EDUCATION

BSC IN COMPUTER SCIENCE AND ENGINEERING 2015 — 2019

East West University
CGPA: (3.13 / 4.00)

HIGHER SECONDARY CERTIFICATE

2011 — 2013

Kushtia Government College
GPA: (4.6 / 5.00)

SECONDARY SCHOOL CERTIFICATE

2010 — 2011

Kushtia Zilla School
GPA : (5.00 / 5.00)

TECHNICAL SKILLS

PROGRAMMING LANGUAGE: C, C++

WEB BASED: PHP, LARAVEL, HTML5, CSS3, JAVASCRIPT, AJAX, JQuery, REST API, React JS

DBMS: ORACLE, MYSQL, MICROSOFT ACCESS

OPERATING SYSTEM: WINDOWS, UBUNTU

DESIGN AND OFFICE TOOLS: MS OFFICE, VERSION CONTROL SYSTEM (GIT)

THESIS

PLANT LEAF DISEASE DETECTION (IMAGE PROCESSING)

This is basically a machine learning related work in which the system detect a leaf whether it is affected by disease or not as well as it also show the name of the disease.

PROJECTS

Hospital management system

This system is developed by using Laravel, jquery, Ajax, Bootstrap. It can collaborate admin, doctors, patients, laboratorists, accountants so that all the paperworks and manual tiresome works can be automated easily and efficiently.

<https://github.com/Asaduzzaman71/clinic-management-system>

Pharmacy management system

This system is developed by using Laravel, It can perform the Point of sale's related task of any pharmacy.

<https://github.com/Asaduzzaman71/pharmacy-management-system>

ECOMMERCE SYSTEM USING LARAVEL

This project is developed by using LARAVEL framework, HTML, CSS, MySQL, Java Script , Bootstrap.

Link: <https://github.com/Asaduzzaman71/Ecommerce-system-using-laravel>

ECOMMERCE SYSTEM

This project was developed by using a PHP OOP, HTML, CSS, MySQL, Java Script, where user can buy and sell their products by posting an ad for their product. Admin can control the system with security.

Link: <https://github.com/Asaduzzaman71/Ecommerce-website>

ONLINE BUS TICKET RESERVATION SYSTEM

This project was done by using PHP, HTML, CSS, where the system provides its users all information and schedule of the bus along with ticket price based on destination and reserves and cancel tickets..

Link: <https://github.com/Asaduzzaman71/ONLINE-BUS-TICKET-RESERVATION-SYSTEM>

BANK MANAGEMENT SYSTEM

This project was done by using C++. This system is able to keeps records of all employees and Conducts all basic operations related to banking.

Link: <https://github.com/Asaduzzaman71/bank-management-system>

AMBULANCE SERVICE SYSTEM

This project is based on DIJKSTRA algorithm developed in C++ .Which can find the nearest hospital location and the routes of the hospital using this algorithm.

Link: <https://github.com/Asaduzzaman71/Ambulance-service-system>

CAR DETECTION (IMAGE PROCESSING)

This project was done by using Tensor flow object detection API with faster RCNN. It can detect and locate the car from an image.

INTERESTS

Programming, Travelling, Photography.

EXTRA CURRICULAR ACTIVITIES

General member of East West University Computer Programming club.

Actively participated in voluntaries activities with Shawpno Foundation.
